

Major Software Project: Allocation of Tasks

For our software project we decided it would be best to allocate each other tasks to do when working on the project.

James

- Creating the github folder
- Starting the Javascript, HTML and CSS code
- Creating the main divs and variables which would be seen throughout the code
- Evaluating the solution
- User manual
- Intrinsic and Internal documentation
- The local storage

Zac

- Allocation of tasks - decided along with James
- Logbook
- Gantt chart
- Screen designs/prototypes - with James
- Data dictionary
- System flowcharts
- Data flow diagram
- Structured chart
- General help with the code and adding text
- A little bit of customising with the CSS and HTML
